

# ChildInsight — Learning Progress Report

Generated on September 12, 2026 • Reporting Window: All Recorded History

|                          |        |                  |                   |
|--------------------------|--------|------------------|-------------------|
| Student: Leo [Demo Data] | Age: 6 | Grade: 1st Grade | Language: English |
|--------------------------|--------|------------------|-------------------|

## Overall Performance & Engagement Summary

| Metric                | Score / Value | Benchmark Notes                                 |
|-----------------------|---------------|-------------------------------------------------|
| Overall Accuracy      | 83.3%         | Weighted by total question attempts             |
| Completion Rate       | 100.0%        | 6 of 6 sessions completed                       |
| Consistency Index     | 67.5 / 100    | Stability across activity sessions              |
| Engagement Score      | 86.2 / 100    | Multi-signal persistence & curiosity index      |
| Composite Performance | 83.5 / 100    | 60% Accuracy + 20% Completion + 20% Consistency |

## Learning Pattern Engine Observation

|                                                                                    |
|------------------------------------------------------------------------------------|
| <b>Pattern Group:</b> Visual + Memory Strong Interaction                           |
| <b>Observation:</b> Recent sessions show stronger engagement in visual activities. |

## Educational Domain Performance

| Domain          | Accuracy | Sessions Recorded | Status / Focus     |
|-----------------|----------|-------------------|--------------------|
| Visual Learning | 100.0%   | 2                 | Strong Performance |
| Logic           | 66.7%    | 1                 | Steady Progress    |
| Numbers         | 66.7%    | 1                 | Steady Progress    |
| Language        | 0.0%     | 0                 | Not Explored Yet   |
| Memory          | 83.3%    | 2                 | Strong Performance |

## Tailored Learning Recommendations (with Explainable Reasons)

| Priority | Activity                    | Category / Level       | Reason for Recommendation                                                                                                                                            |
|----------|-----------------------------|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| #1       | Pattern Spotter [Demo Data] | Visual Learning (Easy) | High accuracy (100%) and strong completion (100%) in Visual Learning demonstrate readiness for Easy level. Let's try Pattern Spotter [Demo Data] in Visual Learning. |
| #2       | Sequence Recall [Demo Data] | Memory (Easy)          | High accuracy (83%) and strong completion (100%) in Memory demonstrate readiness for Easy level. Let's try Sequence Recall [Demo Data] in Memory.                    |

|    |                             |                    |                                                                                                                                                              |
|----|-----------------------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| #3 | Animal Friends [Demo Data]  | Logic (Beginner)   | Balanced engagement in Logic (67% accuracy, 100% completion). Keep reinforcing skills at Beginner level. Let's try Animal Friends [Demo Data] in Logic.      |
| #4 | Count the Items [Demo Data] | Numbers (Beginner) | Balanced engagement in Numbers (67% accuracy, 100% completion). Keep reinforcing skills at Beginner level. Let's try Count the Items [Demo Data] in Numbers. |

**Notice:** Responsible-Use Notice: ChildInsight observes educational interaction patterns to offer learning insights. It does not evaluate, assess, or diagnose any medical or psychological condition. If persistent learning challenges are observed, discuss them gently with a qualified educator or counsellor.
